BIOLOGY

1) A jawless fish, which lays eggs in freshwater and whose larvae after metamorphosis return to the ocean is :-

- (1) *Rohu*
- (2) *Catla*
- (3) *Petromyzon*
- (4) *Hippocampus*

2) Identify the mismatch among the following ?

- (1) Reptiles - Cleidoic eggs
- (2) Amphibians - Epidermal scales
- (3) Mammals - Corpus callosum
- (4) Aves - Pneumatic bones

3) Which of the following feature is common between birds and mammals?

- (1) Pigmented skin and bony endoskeleton
- (2) Pulmonary respiration and four-chambered heart
- (3) Viviparity and 12 pair of cranial nerves
- (4) Homeotherms and three-chambered Heart

4) Amphibians share with reptiles all of the following characters except.

- (1) Ventral heart
- (2) Indirect development
- (3) Dioecious, oviparous
- (4) Poikilothermic

5) The organism can be divided into equal halves by passing through a plane at any angle along a central axis is called:

- (1) Radial symmetry
- (2) Bilateral symmetry
- (3) Asymmetry
- (4) More than one option is correct

6) Which of the following phylum possess multicellular, organ grade level of organization?

- (a) Platyhelminthes (b) Porifera
- (c) Nematode (d) Protozoa

AIM: FREE EDUCATION TO ALL APUL

- (1) a, b, are c are correct
- (2) a and b are correct
- (3) b and d are correct
- (4) a is correct

7) Radial symmetry is present in :-

- (1) Coelenterata
- (2) Ctenophora
- (3) Both (1) and (2)
- (4) Platyhelminthes

8) Organ level of organisation is found in :-

- (1) *Spongilla*
- (2) *Pleurobrachia*
- (3) *Taenia*
- (4) *Obelia*

9) Triploblastic animals belongs to the phylum :-

- (1) Coelenterata to chordata
- (2) Aschelminthes to chordata
- (3) Platyhelminthes to chordata
- (4) Annelida to chordata

10) Select the incorrect statement from the following :

- (1) Cyclostomates have an elongated body bearing 6-15 pairs of gill slits.
- (2) All chordates are vertebrates.
- (3) Bony fishes have four pairs of gills with operculum.
- (4) Reptiles are poikilotherms.

11) Which is true for Reptilia ?

- (1) They have external ear openings
- (2) Sexes are separate and fertilisation is external
- (3) Both 1 and 2
- (4) Snakes and lizards shed their scales as skin cast

12) *Rana* and *Bufo* are the members of class-Amphibia bearing which of the following characters?

- (1) A tympanum represents the ear.
- (2) These are cold-blooded animals.
- (3) They have moist skin without scales.
- (4) All of these

AIM: FREE EDUCATION TO ALL APUL

13) The members of class osteichthyes are called bony fishes having numerous distinguishable characters, but which of the following cannot be considered as their character?

- (1) Skin is covered with cycloid / Ctenoid scales.
- (2) Air bladder is present which regulates buoyancy.
- (3) In males pelvic fins bear claspers.
- (4) Mouth is mostly terminal.

14) Characteristic feature of mammals is/are :-

- (1) Diaphragm not found in all mammals
- (2) Milk produces glands by which young ones are nourished.
- (3) All are viviparous
- (4) All having external fertilization

15) Members of class Reptilia, Aves and Mammalia are amniotes and have lots of common features, but they differ from each other remarkably. Select the common features among them ?

- (1) Fertilisation is internal
- (2) Development is direct
- (3) Sexes are separate
- (4) All of these

16) Which one of the following is not a characteristic of cyclostomes?

- (1) Cyclostomes have a sucking and circular mouth without jaws.
- (2) Cranium and vertebral column are bony
- (3) Circulation is of closed type
- (4) Cyclostomes are marine but migrate for spawning to fresh water.

17) Which of the following fish is also known as "Great white shark"?

- (1) *Pristis*
- (2) *Trygon*
- (3) *Clarias*
- (4) *Carcharodon*

18) Select the distinguishable characters of Reptiles from Amphibians ?

- (1) Dry and cornified skin
- (2) Development is direct
- (3) Fertilisation is internal
- (4) All of these

19) Poisonous snake is :-

AIM: FREE EDUCATION TO ALL APUL

- (1) Cobra
- (2) Krait
- (3) Viper
- (4) All of these

20) In which of the following animals, jaws are absent?

- (1) Exocoetus
- (2) Hippocampus
- (3) Myxine
- (4) Trygon

21) Which of the following groups belongs to cold blooded animals ?

- (A) Chondrichthyes (B) Amphibia
- (C) Aves (D) Mammalia

- (1) A and C
- (2) B and D
- (3) C and D
- (4) A and B

22) Which of the following bird is flight less ?

- (1) Pigeon
- (2) Ostrich
- (3) Crow
- (4) Peacock

23) Which of the following is not a feature of Cartilaginous fishes ?

- (1) Presence of placoid scales
- (2) Notochord persistent throughout life
- (3) Three chambered heart
- (4) Sexes are separate

24) Reptiles are the most successful land vertebrates. Which type of locomotion is found in them ?

- (1) Jumping
- (2) Saltatorial
- (3) Crawling
- (4) Dragging

25) Which of the following group of animals belongs to the same class ?

- (1) *Chelone*, *Corvus*
- (2) *Macropus*, *Myxine*

AIM: FREE EDUCATION TO ALL APUL

(3) *Calotes*, *Naja*

(4) *Alligator*, *Pavo*

26) Monkey, Lion, Bat, Kangaroo are classified in same :-

(1) Order

(2) Family

(3) Class

(4) Intra class

27) Select the limbless amphibia :-

(1) *Salamandra*

(2) *Naja*

(3) *Ichthyophis*

(4) Both (2) and (3)

28) Identify the correct statement :

(1) Gills of the bony fishes are covered by operculum

(2) Alimentary canal of amphibian opens outside through anus at posterior end

(3) Crocodile has three chambered heart

(4) Birds are poikilothermal animals

29) Which one of the following bird is different from rest of the birds ?

(1) *Neophron*

(2) *Struthio*

(3) *Psittacula*

(4) *Corvus*

30) Which of the following statements are true for birds ?

(A) Hind limb are partially modified into wings.

(B) Long bones are non-pneumatic

(C) Fertilisation is internal.

(D) Air sacs connected to lungs supplement respiration

(1) A, B

(2) B, C

(3) A, D

(4) C, D

31) Which of the following is a correct pair ?

(1) *Hyla* - Coelenterate

(2) *Pteropus* - Flying fish

AIM: FREE EDUCATION TO ALL APUL

(3) *Doliolum* - Protochordate

(4) *Carcharodon* - Bony fish

32) Which one of the following statements is true?

(1) Cyclostomes are jawed animals

(2) Osteichthyes are tetrapods

(3) All acoelomates are diploblastic

(4) Some mammals are aquatic

33) Mammalian limbs are adapted for :-

(1) Walking

(2) Burrowing

(3) Both (1) and (2)

(4) Copulation

34) In osteichthyes group :

(1) Fertilisation is usually internal

(2) Placoid scales are more common

(3) Gill cover is found

(4) Air bladder is absent

35) Urochordata includes :

(1) *Salpa*

(2) *Branchiostoma*

(3) *Balanoglossus*

(4) Both (1) and (2)

36) Which one is not a correct statement ?

(1) In *Scoliodon* larva is present.

(2) Poison gland is present in *Bangarus*.

(3) Air bladder is present in *Betta*.

(4) All vertebrates are chordates.

37) Which of the following trait does not related to Class-Reptilia ?

(1) *Calotes* is a garden lizard

(2) Fertilisation is always internal

(3) Body is covered by glandular skin

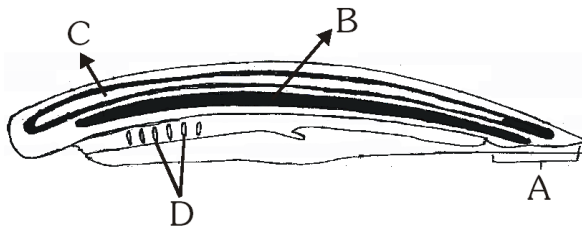

(4) They are oviparous

38) Identify the correct statements from the following with reference to the cartilaginous fishes :

AIM: FREE EDUCATION TO ALL APUL

- (A) In males pectoral fins bear claspers
- (B) Teeth are modified cycloid scales
- (C) Air bladder is absent
- (D) They have internal fertilisation

- (1) A and B
- (2) B and C
- (3) C and D
- (4) A and D

39)

A schematic representation of a typical chordate is shown in the above figure. The structures marked A, B, C and D are respectively :-

- (1) Notochord, Nerve cord, Intestine and Gill slits
- (2) Post-anal part, Gill slits, Nerve cord and Notochord
- (3) Post-anal part, Nerve cord, Notochord and Gill slits
- (4) Post-anal part, Notochord, Nerve cord and Gill slits

40) Reptiles, Birds and Mammals resemble in which character ?

- (1) Number of chambers in heart
- (2) Homeiothermous
- (3) Poikilothermous
- (4) Lungs for respiration

41) Which one of the following pair of animals belongs to '*Cartilaginous fishes*' ?

- (1) *Labeo* and *Catla*
- (2) *Pterophyllum* and *Scoliodon*
- (3) *Pristis* and *Trygon*
- (4) *Petromyzon* and *Myxine*

42) Mark the amphibian ?

- (1) *Bufo*
- (2) *Hippocampus*
- (3) *Pristis*
- (4) *Aptenodytes*

43) Which of the following animal is not viviparous ?

AIM: FREE EDUCATION TO ALL APUL

- (1) Tiger (*Panthera*)
- (2) Monkey (*Macaca*)
- (3) Kangaroo (*Macropus*)
- (4) Duck-billed platypus (*Ornithorhynchus*)

44) Select the correct option with respect to given diagram :-

- (1) Homeothermic
- (2) Apterodactyls
- (3) Viviparous
- (4) Largest living bird

45) Which one of the following give birth to their young ones but the female do not secrete milk ?

- (1) Platypus
- (2) Ostrich
- (3) Kangaroo
- (4) Dog fish

46) Pick the incorrect pair :-

- (1) Cellular level : Porifera
- (2) Tissue level : Aschelminthes
- (3) Organ level : Platyhelminthes
- (4) Organ system level : Annelida

47) Animals possess various types of symmetry. Select the correctly matched :-

- (1) Echinodermata - radial symmetry
- (2) Arthropoda - bilateral symmetry
- (3) Porifera - mostly asymmetrical
- (4) All of these

48) The animals in which body cavity is absent are called :-

- (1) Pseudocoelomates
- (2) Acoelomates
- (3) Enterocoelomates
- (4) Schizocoelomates

AIM: FREE EDUCATION TO ALL APUL

49) Radial symmetry is present in :-

- (1) Coelenterata
- (2) Ctenophora
- (3) Both (1) and (2)
- (4) Platyhelminthes

50) The symmetry found in an animal which can be divided into identical left and right halves in only one plane is:-

- (1) Spherical
- (2) Bilateral
- (3) Radial
- (4) Biradial

51) Fresh water sponge is :-

- (1) *Euspongia*
- (2) *Spongilla*
- (3) *Sycon*
- (4) *Scypha*

52) Choose the correct statement from the following :-

- (1) Poriferans are generally marine
- (2) Mostly poriferans are asymmetrical
- (3) Choanocytes or collar cells line the spongocoel and the canals.
- (4) All of the above

53) Select the option with all pseudocoelomates animals :-

- (1) *Ascaris*, *Fasciola*, *Taenia*
- (2) *Culex*, *Locusta*, *Limulus*
- (3) *Wuchereria*, *Ascaris*, *Ancylostoma*
- (4) *Nereis*, *Hirudinaria*, *Wuchereria*

54) Digestion in Cnidarians is :-

- (1) Extracellular
- (2) Intracellular
- (3) Both 1 and 2
- (4) None of these

55) Which of the following pair of animals comprises 'Comb jellies'?

- (1) *Balanoglossus* and *Saccoglossus*

AIM: FREE EDUCATION TO ALL APUL

(2) *Pleurobrachia* and *Ctenoplana*

(3) Sea anemone and Sea-pen

(4) Sea lily and Brittle star

56) A phylum which has triploblastic and acoelomate animals :-

(1) Ctenophora

(2) Platyhelminthes

(3) Coelenterata

(4) All of the above

57) Which type of locomotory organ is found in "Comb jelly" ?

(1) Cilia

(2) Tube feet

(3) Tentacle

(4) Combplates

58) Over two-thirds of all named species on earth are arthropods. Identify their category which is not matching.

(1) Living fossil - King crab

(2) Vector - *Culex*

(3) Gregarious pest - *Limulus*

(4) Economically important - *Apis*

59) Which of the following may be considered as the unique feature of members of phylum Arthropoda ?

(1) They have ventral nerve cord

(2) They have open circulatory system

(3) They have jointed appendages

(4) Development may be direct or indirect

60) The members of phylum Aschelminthes are called round worms and have numerous distinguishable characters, but which of the following cannot be considered as their character?

(1) These are pseudocoelomate animals

(2) They are bilaterally symmetrical

(3) They have organ system level of body organisation

(4) They are monoecious.

61) Match list-I with list-II and select the correct answer:

List-I (Phylum)	List-II (Animal)
--------------------	---------------------

AIM: FREE EDUCATION TO ALL APUL

A.	Echinodermata	(i)	Ctenoplana
B.	Arthropoda	(ii)	Limulus
C.	Aschelminthes	(iii)	Asterias
D.	Annelida	(iv)	Ascaris
		(v)	Nereis

	A	B	C	D
(1)	(iii)	(i)	(v)	(iv)
(2)	(iii)	(ii)	(v)	(iv)
(3)	(iii)	(ii)	(iv)	(v)
(4)	(ii)	(i)	(iii)	(v)

(1) 1

(2) 2

(3) 3

(4) 4

62) Match the column-I with the column-II and find out the correct answer :-

Column-I		Column-II	
(A)	Spongocoel	(i)	Arthropoda
(B)	Dorso-ventrally flattened body	(ii)	Cnidaria
(C)	Gastro-vascular cavity	(iii)	Porifera
(D)	Chitinous exoskeleton	(iv)	Platyhelminthes

(1) A-iii, B-iv, C-i, D-ii

(2) A-iv, B-iii, C-ii, D-i

(3) A-iii, B-iv, C-ii, D-i

(4) A-ii, B-iv, C-iii, D-i

63) Triploblastic animals belongs to the phylum :-

(1) Coelenterata to Chordata

(2) Aschelminthes to Chordata

(3) Platyhelminthes to Chordata

(4) Annelida to Chordata

64) Which one of the following is not a characteristic of Phylum Mollusca ?

(1) Coelomate

(2) Segmentation

(3) Mantle

AIM: FREE EDUCATION TO ALL APUL

(4) Shell

65) Presence of endoskeleton of calcareous ossicles in the adult and a free swimming bilaterally symmetrical larva are typical characteristics of :-

- (1) Annelida
- (2) Arthropoda
- (3) Mollusca
- (4) Echinodermata

66) Read the following statements :

Hydra typically has

- A. A radially symmetrical body
- B. A gastrovascular cavity
- C. Both polyp and medusa forms.

- (1) A, B and C are correct
- (2) B and C are correct
- (3) A and B are correct
- (4) A and C are correct

67) Nephridia in an Annelid helps in :-

- (1) Excretion
- (2) Osmoregulation
- (3) Both (1) and (2)
- (4) Reproduction

68) Which one of the following possess high regeneration capacity ?

- (1) *Fasciola*
- (2) *Ascaris*
- (3) *Planaria*
- (4) *Physalia*

69) Which of the following is not the feature of phylum Mollusca ?

- (1) It is the second largest phylum of animal kingdom.
- (2) Muscular foot is present
- (3) They are acoelomate animals.
- (4) Presence of shell around the body.

70) Which of the following is a flat worm ?

- (1) Meandrina
- (2) Tape worm
- (3) Filarial worm

AIM: FREE EDUCATION TO ALL APUL

(4) Hook worm

71) Identified the incorrect statement from the following with reference to round worm :

- (A) Have well developed muscular pharynx
- (B) Mostly ectoparasites and free-living
- (C) They are unisexual
- (D) Incomplete alimentary canal

- (1) A and B
- (2) B and C
- (3) B and D
- (4) A and D

72) Identify incorrect statement with regard to Coelenterata ?

- (1) Sea anemone is a polyp form.
- (2) Jelly fish is free swimming Coelenterate.
- (3) *Meandrina* exhibit two basic body forms polyp and medusa.
- (4) Digestion is both extracellular and intracellular.

73) Blood sucking leech is :-

- (1) *Nereis*
- (2) *Ancylostoma*
- (3) *Hirudinaria*
- (4) *Wuchereria*

74) Metameric segmentation in the animal hierarchy first developed in which phylum?

- (1) Ctenophora
- (2) Chordata
- (3) Annelida
- (4) Arthropoda

75) Which one of the following is a Mollusc animal ?

- (1) Sea horse
- (2) Sea lily
- (3) Sea mouse
- (4) Sea hare

76) Segmentation is found in :-

- (1) Earthworm
- (2) Tap worm
- (3) Round worm

AIM: FREE EDUCATION TO ALL APUL

(4) Star fish

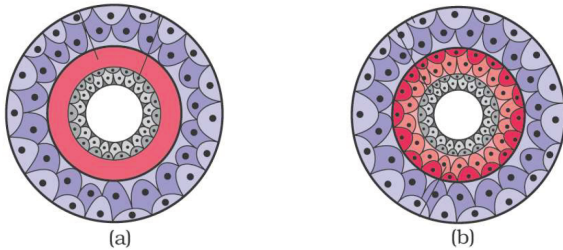

77) Which one of the following invertebrates is bilaterally symmetrical and pseudocoelomate ?

- (1) *Pila*
- (2) *Nereis*
- (3) *Wuchereria*
- (4) *Hirudinaria*

78) Select the group of organisms which have diploblastic members only ?

- (1) *Ctenoplana*, *Taenia*, *Fasciola*
- (2) *Physalia*, *Meandrina*, *Adamsia*
- (3) *Wuchereria*, *Culex*, *Limulus*
- (4) *Aedes*, *Ascaris*, *Hydra*

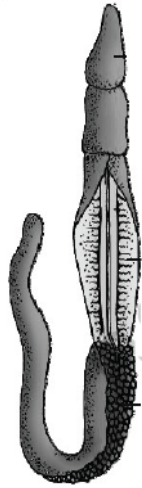

79) Mark the correct answer :

	(a)	(b)
(1)	Porifera - <i>Sycon</i> , <i>Spongilla</i>	Coelenterata - <i>Hydra</i> , <i>Obelia</i>
(2)	Ctenophora - <i>Pleurobranchia</i> <i>Ctenoplana</i>	Annelida - Earthworm, <i>Adamsia</i>
(3)	Cocelenterata - Coral, <i>Aurelia</i>	Mollusca - <i>Pila</i> , <i>Pinctada</i>
(4)	Arthropoda - Prawn, <i>Lepisma</i>	Hemichordata - <i>Balanoglossus</i> , <i>Saccoglossus</i>

- (1) 1
- (2) 2
- (3) 3
- (4) 4

AIM: FREE EDUCATION TO ALL APUL

80) Select the correct option for given animal.

- (1) Circulatory system is of open type
- (2) Marine animal with organ-system level of organization
- (3) Respiration take place through gills
- (4) All of these

81) Sea lily is the common name of :-

- (1) *Asterias*
- (2) *Branchiostoma*
- (3) *Doliolum*
- (4) *Antedon*

82) Sea-cucumber belongs to :-

- (1) Hemichordata
- (2) Tunicata
- (3) Mollusca
- (4) Echinodermata

83) Suppose you are a taxonomist and you go for field experiment, then you get the maximum species of which animal phylum ?

- (1) Protozoa
- (2) Annelida
- (3) Arthropoda
- (4) Chordata

84) Radial symmetry and cnidioblasts are the characterstic feature of :-

- (1) Starfish and *Hydra*
- (2) *Ctenoplana* and *Physalia*
- (3) *Meandrina* and *Adamsia*
- (4) *Antedon* and *Cucumaria*

AIM: FREE EDUCATION TO ALL APUL

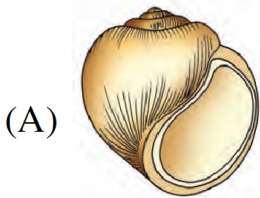

85) Water transport system is found in :-

- (1) Porifera
- (2) Echinodermata
- (3) Mollusca
- (4) Chordata

86) Which one is not a member of Aschelminthes ?

- (1) *Ascaris*
- (2) *Ancylostoma*
- (3) *Wuchereria*
- (4) *Fasciola*

87) Identify the correct features for given diagram.

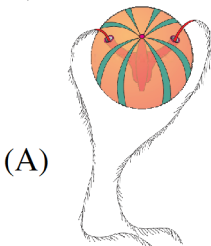

- (i) Living fossil
- (ii) Body covered by calcareous shell
- (iii) Gills perform respiratory & excretory function
- (iv) Gregarious pest
- (v) Chitinous Exoskeleton.
- (vi) Dioecious

	A	B
(1)	i, ii, iii, vi	iv, v, vi
(2)	ii, iii, vi	i, iv, v, vi
(3)	ii, iv, vi	iii, iv, v
(4)	ii, iii, vi	iv, v, vi

- (1) 1
- (2) 2
- (3) 3
- (4) 4

88) Which one is common feature for given animal speciman A & B :

AIM: FREE EDUCATION TO ALL APUL

- (1) Presence of Nematoblast
- (2) Presence of comb-plates
- (3) Presence of metagenesis
- (4) Presence of tentacles

89) Presence of radula is characteristic of a phylum to which following animals are also associated :

- (1) *Locusta, Pila*
- (2) *Prawn, Pila*
- (3) *Pila, Octopus*
- (4) *Balanoglossus, Aplysia*

90) Notochord is originated from :-

- (1) Ectoderm
- (2) Mesoderm
- (3) Endoderm
- (4) Ectomesoderm

AIM: FREE EDUCATION TO ALL APUL

SOLUTIONS

BIOLOGY

1) *Petromyzon*

Correct answer is option (3)

2)

Amphibians - Epidermal scales

Correct answer is option (2)

3)

Pulmonary respiration and four-chambered heart

Correct answer is option (2)

4)

Indirect development

Correct answer is option (2)

5) **Solution:** The organism can be divided into equal halves by passing through a plane at any angle along a central axis is called Radial symmetry. **The correct option is (1).**

6)

Platyhelminthes is correct

Correct answer is option (4)

7)

(1) Coelenterata

(2) Ctenophora

Correct answer is option (3)

8) *Taenia*

Correct answer is option (3)

9)

Platyhelminthes to chordata

Correct answer is option (3)

AIM: FREE EDUCATION TO ALL APUL

10)

All chordates are vertebrates.

Correct answer is option (2)

11)

Snakes and lizards shed their scales as skin cast

Correct answer is option (4)

12)

(1) A tympanum represents the ear.

(2) These are cold-blooded animals.

(3) They have moist skin without scales.

(4) All of these

Correct answer is option (4)

13)

In males pelvic fins bear claspers.

Correct answer is option (3)

14)

Milk produces glands by which young ones are nourished.

Correct answer is option (2)

15)

(1) Fertilisation is internal

(2) Development is direct

(3) Sexes are separate

(4) All of these

Correct answer is option (4)

16)

Cranium and vertebral column are bony

Correct answer is option (2)

17) *Carcharodon*

Correct answer is option (4)

18)

(1) Dry and cornified skin

AIM: FREE EDUCATION TO ALL APUL

(2) Development is direct
(3) Fertilisation is internal
(4) All of these
Correct answer is option (4)

19)

(1) Cobra
(2) Krait
(3) Viper
(4) All of these
Correct answer is option (4)

20)

Myxine
Correct answer is option (3)

21)

(A) Chondrichthyes
(B) Amphibia
Correct answer is option (4)

22)

Ostrich
Correct answer is option (2)

23)

Three chambered heart
Correct answer is option (3)

24)

Crawling
Correct answer is option (3)

25) *Calotes, Naja*
Correct answer is option (3)

26)

Class
Correct answer is option (3)

AIM: FREE EDUCATION TO ALL APUL

27) *Ichthyophis*

Correct answer is option (3)

28)

Gills of the bony fishes are covered by operculum

Correct answer is option (1)

29) *Struthio*

Correct answer is option (2)

30)

(C) Fertilisation is internal.

(D) Air sacs connected to lungs supplement respiration

Correct answer is option (4)

31) *Doliolum* - Protochordate

Correct answer is option (3)

32)

Some mammals are aquatic

Correct answer is option (4)

33)

(1) Walking

(2) Burrowing

Correct answer is option (3)

34)

Gill cover is found

Correct answer is option (3)

35) *Salpa*

Correct answer is option (1)

36)

In *Scoliodon* larva is present.

Correct answer is option (1)

37)
